What's New — Individuals

Tax Provision	New Law	Prior Law			
	Credits				
Premium Tax Credit See page 5-2	Effective for 2021 through 2025, the percentages used to calculate the PTC are reduced to zero for taxpayers below 200% of the federal poverty line, and up to 8.5% for those above 400% of the federal poverty line. A taxpayer with an applicable percentage of zero means the taxpayer qualifies for 100% of his/her health insurance premiums to be subsidized.	The Premium Tax Credit (PTC) is a refundable credit designed to subsidize the cost of health insurance. The PTC amount is determined based on the percentage of income the cost of premiums represents, ranging from 2% of income for those below 133% of the federal poverty line to 9.5% of income for those at 400% of the federal poverty line. Taxpayers with income above 400% of the federal poverty line do not qualify for the PTC.			

What's New — Individuals

Tax Provision	New Law	Prior Law
Credits—continue	d	
Energy Efficient Home Improvement Credit See page 5-2	Effective for 2023, the nonbusiness energy property credit is renamed the energy efficient home improvement credit. The credit is increased to 30% of the cost of improvements made, and replaces the lifetime limitations to the following annual limitations. 1) In general, the combined credit for all energy efficient home improvements is limited to \$1,200 per year, except for (5) below. 2) The credit for residential energy property expenditures is limited to \$600 per year. 3) The credit for windows is limited to \$600 in the aggregate for all exterior windows and skylights. 4) The credit for doors is limited to \$250 per year for any exterior door, and \$500 in the aggregate for all exterior doors. 5) Notwithstanding paragraphs (1) and (2) above, the credit allowed for heat pumps and heat pump water heaters, biomass stoves and boilers is limited to \$2,000 per year. 6) The credit for energy audits is limited to \$150 per year. Qualified energy efficiency improvements include energy efficient insulation, exterior windows, skylights, and exterior doors that meet various energy standard requirements. The new law removes roofs from the definition of building envelope components, but adds air sealing insulation to the definition of insulation material or system which reduces the heat loss or heat gain of a dwelling unit.	The nonbusiness energy property credit is for energy efficient improvements made to the principal residence of the taxpayer. The credit does not apply for new construction. The credit equals: • 10% of the cost of exterior windows, including skylights, up to a credit limit of \$200, • 10% of the cost of exterior doors, insulation and/or systems which reduce heat gain or loss, • Up to \$300 of the cost of heat pumps, central air conditioners, and water heaters, • Up to \$150 of the cost of natural gas, propane, or oil furnaces or hot water boilers, and • Up to \$50 of the cost for qualified advanced main air-circulating fans. A total lifetime combined credit limit of \$500 (including a \$200 lifetime limit for windows) applies for all tax years after 2005. The nonbusiness energy property credit was set to expire for tax years after 2021.
Residential Clean Energy Credit See page 5-3	The Residential Energy Efficient Property Credit is renamed the Residential Clean Energy Credit, with the applicable percentages being modified as follows. 1) In the case of property placed in service after December 31, 2016, and before January 1, 2020, 30%, 2) In the case of property placed in service after December 31, 2019, and before January 1, 2022, 26%, 3) In the case of property placed in service after December 31, 2021, and before January 1, 2033, 30%, 4) In the case of property placed in service after December 31, 2032, and before January 1, 2034, 26%, and 5) In the case of property placed in service after December 31, 2033, and before January 1, 2035, 22%. The new law replaces qualified biomass fuel property expenditures with qualified battery storage technology expenditures.	The residential energy efficient property credit equals the sum of the applicable percentages of: 1) The qualified solar electric property expenditures, 2) The qualified solar water heating property expenditures, 3) The qualified fuel cell property expenditures, 4) The qualified small wind energy property expenditures, 5) The qualified geothermal heat pump property expenditures, and 6) The qualified biomass fuel property expenditures, that are made by the taxpayer during the year. Applicable percentages mean: 1) In the case of property placed in service after December 31, 2016, and before January 1, 2020, 30%, 2) In the case of property placed in service after December 31, 2019, and before January 1, 2023, 26%, and 3) In the case of property placed in service after December 31, 2022, and before January 1, 2024, 22%.
Clean Vehicle Credit See page 5-5	The new law eliminates the phase-out rules when a manufacturer reaches its 200,000th sale and replaces it with an expiration of the credit for all vehicles placed in service after 2032. Final assembly of the vehicle must occur within North America. In addition to qualified electric vehicles, the credit also applies to qualified fuel cell motor vehicles. No credit is allowed if the taxpayer's modified AGI for the tax year or the preceding tax year exceeds: • \$300,000 for MFJ or QSS. • \$225,000 for HOH. • \$150,000 for Single or MFS. Taxpayers may use modified AGI from the year delivery of the vehicle is taken or the year before, whichever is less. No credit is allowed if the manufacturer's suggested retail price exceeds: • \$80,000 in the case of a van, • \$80,000 in the case of a sport utility vehicle, • \$80,000 in the case of a pickup truck, and • \$55,000 in the case of any other vehicle. The new law also provides for a reduced credit for the purchase of a previously-owned clean vehicle.	A taxpayer is allowed a nonrefundable tax credit for the purchase of a new qualified plug-in electric drive motor vehicle placed in service during the year. The base amount of the credit is \$2,500. This amount is increased by \$417 for each kilowatt hour of battery capacity that exceeds 5 kilowatt hours, not to exceed \$5,000. Thus the maximum credit allowed is \$7,500. The credit phases out when the manufacturer sells at least 200,000 qualifying vehicles.

What's New - Individuals

Tax Provision	New Law	Prior Law		
Credits—continued				

Alternative Fuel Refueling Property Credit See page 5-12

The new law extends the credit through the end of 2032, and increases the credit limitation for business use property to \$100,000. The new law also allows the credit for bidirectional charging equipment, such as an electric vehicle charging station that converts the DC electricity stored in the car batteries back to AC electricity to power the house in case of a power outage.

A tax credit equal to 30% of the cost of qualified property is allowed for placing in service property used to store or dispense an alternative fuel into the fuel tank of a motor vehicle propelled by the fuel, or used to recharge an electric vehicle. The credit is limited to \$30,000 for business use property or \$1,000 for personal use property (such as an electric charging station installed in the taxpayer's garage to charge the batteries of a personal use electric car). The credit was set to expire for property placed in service after 2021.

What's New — Business

Tax Provision New Law Prior Law Deductions

Energy Efficient Commercial Building Deduction See page 5-4

Effective for tax years beginning after December 31, 2022, the new law modifies the maximum amount of the deduction as follows.

- The deduction under IRC section 179D(a) with respect to any building for any tax year shall not exceed the excess (if any) of:
 - A) The product of the applicable dollar value and the square footage of the building, over
 - B) The aggregate amount of the deductions with respect to the building for the three tax years immediately preceding such tax year.
- 2) The applicable dollar value shall be an amount equal to \$0.50 increased (but not above \$1.00) by \$0.02 for each percentage point by which the total annual energy and power costs for the building are certified to be reduced by a percentage greater than 25%.
- 3) Increased deduction amount for certain property:
 - A) In the case of any property which satisfies the requirements of (B) below, the applicable dollar value is \$2.50 increased (but not above \$5.00) by \$0.10 for each percentage point by which the total annual energy and power costs for the building are certified to be reduced by a percentage greater than 25%,
 - B) To qualify for the increased applicable dollar value in (A) above:
 i) Installation must begin prior to the date that is 60 days after
 the IRS publishes guidance with respect to the prevailing
 - wage requirements and apprenticeship requirements, or ii) Installation of such property satisfies the prevailing wage requirements and apprenticeship requirements.

Taxpayers are allowed a deduction under IRC section 179D for the cost of energy efficient commercial building property placed in service during the year. The deduction is limited to the product of \$1.80 times the square footage of the building, over the aggregate amount of the energy efficient commercial building deductions with respect to the building for all prior tax years.

Energy efficient commercial building property means property:

- A) With respect to which depreciation (or amortization in lieu of depreciation) is allowable,
- B) Which is installed on or in any building which is located in the United States that meets certain energy efficient standards,
- C) Which is installed as part of the interior lighting systems, the heating, cooling, ventilation, and hot water systems, or the building envelope, and
- D) Which is certified as being installed as part of a plan designed to reduce the total annual energy and power costs with respect to the interior lighting systems, heating, cooling, ventilation, and hot water systems of the building by 50% or more in comparison to a reference building which meets certain minimum standards.

The deduction is similar to the Section 179 deduction that allows a business to write off the entire cost of the property placed in service in one year rather than depreciate the cost over a number of years.

Taxes

Corporate Alternative Minimum Tax (AMT)

Effective for tax years beginning in 2023, the tentative minimum tax for applicable corporations is the excess of 15% of the adjusted financial statement income for the tax year over the corporate AMT foreign tax credit for the tax year. An applicable corporation is any corporation (other than an S corporation, a regulated investment company, or a real estate investment trust) with average annual adjusted financial statement income that exceeds \$1 billion per year.

For tax years prior to 2018, C corporations were not subject to AMT unless average gross receipts were \$7.5 million or more for the prior three tax years. Under the Tax Cuts and Jobs Act (TCJA), the AMT for C corporations was repealed effective for 2018.

What's New — Business

Tax Provision	New Law	Prior Law		
Credits				
Energy Efficient Home Credit See page 5-5	The new law extends the credit to apply to energy efficient homes acquired through the end of 2032. Effective for homes acquired after December 31, 2022, the new law modifies the credit amounts and energy efficiency requirements. The new credit amounts are \$500, \$1,000, \$2,500, and \$5,000, depending on the level of energy savings and efficiency requirements the home meets. The credit amount is based on whether or not the taxpayer meets the prevailing wage requirements.	A general business credit is allowed under IRC section 45L for ar eligible contractor that constructs a new energy efficient home that is acquired by a person from such eligible contractor for use as a residence during the tax year. The credit is equal to \$2,000 in the home has a level of annual heating and cooling energy consumption at least 50% below that of comparable homes, and \$1,000 if such consumption is at least 30% below that of comparable homes. Certain certification requirements apply in determining the level of the home's energy consumption savings. This credit was set to expire for homes acquired after December 31, 2021.		
Commercial Clean Vehicle Credit See page 5-11	Effective for vehicles acquired after December 31, 2022, the new law creates a new code section under IRC section 45W called "Credit for Qualified Commercial Clean Vehicles," which is a general business credit for each qualified commercial clean vehicle placed in service by the taxpayer during the tax year. The credit can be up to 30% of the cost of the vehicle if it is not powered by an internal combustion engine, limited to \$40,000 for vehicles weighing more than 14,000 pounds.	Taxpayers could claim the electric vehicle credit under IRC section 30D, but there was no special credit for commercial electric vehicles.		
Research Credit See page 5-13	Effective for tax years beginning after December 31, 2022, the new law increases the amount of the research credit that small businesses can use against their payroll tax liability to \$500,000.	The research credit under IRC section 41 is allowed to offset the alternative minimum tax (AMT). It also allows qualified small businesses to elect to claim a certain amount of the credit as a payroll tax credit. Qualified small businesses may elect to apply up to \$250,000 of the credit against the employer's portion of Social Security taxes. The credit against payroll taxes is an annual election made by a qualified small business. The credit is the smaller of: • The current year research credit, • An elected amount not to exceed \$250,000, or • The general business credit carryforward for the tax year (before application of the payroll tax credit election for the tax year).		

What's New — Retirement Plans

Tax Provision	New Law	Prior Law
Credit for Small Employer Pension Plan Startup Costs See page 6-3	Effective for 2023, the 50% credit is increased to 100% for certain small employers with no more than 50 employees. Certain small employers are also allowed an additional credit for employer contributions equal to the applicable percentage of employer contributions, limited to \$1,000 per employee. The applicable percentage is 100% for year 1 and 2, 75% for year 3, 50% for year 4, 25% for year 5, and zero % for year 6 and after.	A general business credit is allowed that is equal to 50% of the qualified pension plan startup costs paid during the tax year. The credit is generally limited to the greater of (1) \$500, or (2) the lesser of (a) \$250 for each employee of the eligible employer who is not a highly compensated employee and who is eligible to participate in the plan, or (b) \$5,000.
Saver's Match See page 6-4	Effective for 2027, the credit is repealed with respect to IRA and retirement plan contributions, and replaced with a tax credit paid by the IRS as a contribution to the eligible individual's applicable retirement savings vehicle when he or she makes a qualified retirement savings contribution for the tax year. The matching contribution equals 50% of the qualified retirement savings contribution when AGI does not exceed \$41,000 for MFJ and QSS, \$30,750 for HOH, and \$20,500 for single and MFS. The credit begins to phase-out when AGI exceeds these limits, and is completely phased-out when AGI reaches \$71,000 for MFJ and QSS, \$53,250 for HOH, and \$35,500 for single and MFS. These phase-out amounts are adjusted for inflation beginning in 2028.	Effective for 2023, low income taxpayers are allowed a nonrefundable tax credit for contributions to an IRA or employer-sponsored retirement plan. Contributions to an ABLE account by the designated beneficiary also qualify for the credit. The credit rate is 50% for AGI up to \$43,500 for MFJ, \$32,625 for HOH, and \$21,750 for all others. The credit rate is reduced to 20% when AGI is \$43,501 to \$47,500 for MFJ, \$32,626 to \$35,625 for HOH, and \$21,751 to \$23,750 for all others. The credit rate is reduced to 10% when AGI is \$47,501 to \$73,000 for MFJ, \$35,626 to \$54,750 for HOH, and \$23,751 to \$36,500 for all others. The credit is zero when AGI exceeds these limits. These limits increase each year for inflation.

Retirement Plan	s—continued	
Age for Required Beginning Date for RMDs See page 6-5	Effective for 2023, taxpayers are required to start taking RMDs by April 1 of the calendar year following the year in which the individual reaches age 73. Effective for 2033, taxpayers are required to start taking RMDs by April 1 of the calendar year following the year in which the individual reaches age 75. Thus, individuals who attain age 74 in 2033 do not need to start taking RMDs until April 1, 2035, the year after they attain age 75.	Prior to 2020, taxpayers were required to start taking required minimum distributions (RMDs) from qualified retirement plans and IRAs by April 1 of the calendar year following the year in which the individual reached age 70½. Effective for 2020, no RMDs were required. Effective for 2021, taxpayers were required to start taking RMDs by April 1 of the calendar year following the year in which the individual reached age 72.
IRA Catch-Up Limit See page 6-5	Effective for 2024, the \$1,000 catch-up amount will be adjusted for inflation.	For 2023, the inflation adjusted IRA contribution limit is \$6,500. For individuals age 50 and over, an additional \$1,000 catch-up contribution is allowed for a combined 2023 limit of \$7,500. Although the IRA contribution limit is adjusted each year for inflation, the \$1,000 catch-up contribution is not.
401(k) / 403(b) / SIMPLE Catch-Up Limits See page 6-6	Effective for 2025, the catch-up elective deferral limits are increased for eligible participants who attain ages 60, 61, 62, and 63 before the close of the tax year. The increased catch-up limits for 401(k) / 403(b) plans is the greater of \$10,000, or 50% more than the regular catch-up limit. The increased catch-up limits for SIMPLE plans is the greater of \$5,000, or 50% more than the regular catch-up limit.	For 2023, the inflation adjusted 401(k) / 403(b) elective deferral limit is \$22,500. For individuals age 50 and over, an additional \$7,500 catch-up contributions is allowed. For 2023, the inflation adjusted SIMPLE elective deferral limit is \$15,500. For individuals age 50 and over, an additional \$3,500 catch-up contribution is allowed. These amounts are adjusted each year for inflation.
Elective Deferral Limits and Employer Matching Contributions to SIMPLE Plans See page 6-8	Effective for 2024, an employer can choose to make non-elective contributions of a uniform percentage (for all employees) at a rate up to 10% of compensation for each employee who is eligible to participate, and who has at least \$5,000 of compensation for the year. These non-elective contributions cannot exceed \$5,000 for the year (adjusted annually for inflation). The elective deferral limit is also increased to 110% of the otherwise applicable elective deferral limit if the employer has no more than 25 employees who have at least \$5,000 in compensation for the year. Larger employers can elect to have this 110% limit apply. If they make this election, the employer's 3% match is increased to 4%, and the employer's 2% non-elective match is increased to 3%.	For 2023, the inflation adjusted SIMPLE elective deferral limit is \$15,500. Unless the employer chooses to make non-elective contributions, the employer must match employee elective deferrals dollar-for-dollar up to 3% of the employee's compensation for the year. If the employer chooses to make non-elective contributions on behalf of all eligible employees (including those who choose not to make elective deferrals), the employer must make contributions on behalf of each employee equal to 2% of employee compensation.
401(k)/403(b) Catch-Up Elective Deferrals Must Be Designated Roth Contributions See page 6-18	Effective for 2024, participants whose wages for the preceding year exceed \$145,000 can only make catch-up elective deferrals as designated Roth contributions. If the plan does not provide for a designated Roth option, then participants with wages exceeding \$145,000 cannot make additional catch-up elective deferrals. This rule does not apply to SEPs or SIMPLE plans. The \$145,000 threshold is indexed for inflation after 2024.	Catch-up contributions to a qualified retirement plan for participants age 50 or older can be made on a pre-tax or Roth basis (if a Roth option is permitted by the plan sponsor).
